Creators : Developer Persona - SANDY

Robin uses the low-code, drag-and-drop browser based visual developer tool to design and build reusable web and mobile applications:

- Business Objects
- Service Data Providers
- Data binding for UI Components
- Rich Web application UI
- Native Mobile Application UI
- Versionable Applications via DevCS
- Custom Components (CCA)
 - Chatbot component

SANDY
Developer
Develops the Café Supremo HR
Application

Autonomous Visual Builder Cloud:

- Visual Page Layout
- Visual Page Flow Diagram
- Visual Action Definition
- Visual REST Connection
- Visual Business Object Creation
- Visual Business Objects Logic
- Directly access code
- Add your own logic
- Extendable platform
 - UI Components
 - JavaScript Libraries
 - Styles

Developer

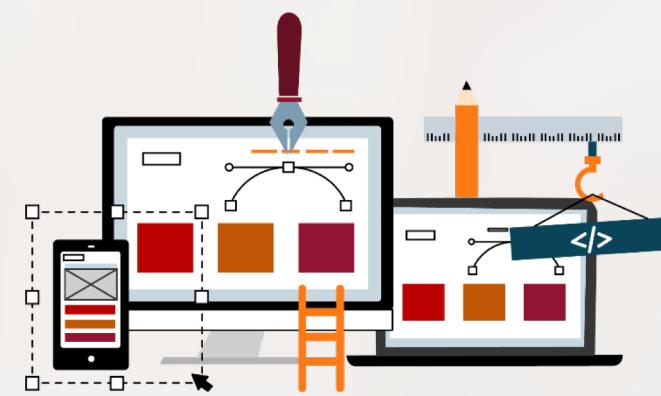

Sandy, receives new requirements for the HR App and shares it with the development team. They can quickly collaborate using Wiki's in DevCS, and decide which part needs to be build.

Sandy uses low code development tool to build the new functionality and adds it in the Café Supremo HR app

Edit, drop and swap components as required.

Sandy builds custom apps with modern DevOps tools, and embed them into the site. After completing her work, Robin Synchronizes it with GitHub repository in DevCS and Publishes the application

Integrated Cloud Applications & Platform Services
